APEX MECHS

Apex Mechs is a free tactical mech auto-battler for Android. Round by round you draft mech cards, earn crystals, deploy your army on the grid — and then watch your plan play out against strategies built by real players. Every match is decided by tactics, not reflexes: what you build, where you place it and what you counter.

What Awaits Players

- **Formation Decides the Fight.** Tanks hold the front, ranged mechs fire from the back, unit speed decides who reaches the enemy first. Only units that survive the round damage the enemy commander, so keeping your carries alive matters more than raw power.
- **Upgrades and Artifacts.** Two identical units merge into a stronger one. Artifacts add damage, HP, shields and range to your key mechs, while buildings and towers bring income and buffs.
- **Counter-Picks.** Every unit has strengths and weaknesses: AoE against swarms, tanks against snipers, range against melee. Read what your opponent is building and craft the answer.
- **Commanders and Builds.** Commanders built around firepower, drones, flame, rockets or heavy war machines each open a different path. There is no single best team — you discover your own synergies.
- **Real Players, Live Matches.** In the Arena you face strategies of real players and climb the rating. When someone searches at the same moment, you get a live match. In the War Room you can battle a friend.
- **No Pay-to-Win.** Power can't be bought. The game is free to play with no forced ads; the smarter plan wins.

Additional Information

- **Platforms:** Android (Google Play).
- **Status:** Live and regularly updated; version 0.51 (October 2026).
- **Languages:** 21 languages, including English, Spanish, Portuguese, Russian, German, French, Turkish, Indonesian, Japanese, Korean and Chinese.
- **Who are we:** BearBob Studio, a small independent team of three: a producer, a developer and a game designer.
- **For creators:** We gift Mineralium (in-game currency) to creators and to viewers who leave their in-game ID in the comments.
- **Technical side:** Unity.
